

PARANS

CASE STUDY:

Parans Fiber Optic Skylight Installation in Tiburon, California private residence

Installation Date: January 2009

Location: The system is being used to bring pure, fresh, natural light into a basement room with no direct daylight access.

Result: The Parans system was used because this room is in the basement of the house, and the ability to install the fiber optic cable inside the walls made it the only solution.

Above:
Dark room with electric
lights on.

Right:
L1 Large in the process of
being installed. No electric
lights on.

1/9/09 at 1:25 PM
64 Foot candles with 30' of
fiber optic cable
